Reading This Manual

The purpose of these modules are to emphasize the core policies and procedures of the SET program. This information will be used to provide the skills training necessary to build the foundation of Service Excellence for all Puff n' Stuff Catering team members.

Throughout this manual you will find (4) different icons each symbolizing an important tidbit of information that will assist you while on the job.

TEAM WORK TIP → TIP

Teamwork is the “cooperative or coordinated effort on the part of a group of persons acting together as a team”. These tidbits will help you to function as a single and effective unit.

EFFICIENCY TIP → TIP

Efficiency describes the extent to which time, effort or cost is well used for the intended task. These tidbits will help you to save time and ensure accuracy.

SAFETY TIP → TIP

Maintaining proper food handling standards and staff safety are key elements on any event. These tidbits are reminders on important regulations and guidelines that will keep everyone smiling.

GLOSSARY WORD →

Important service and culinary based definitions. All service team members are expect to know every glossary word found within this manual.

Other approved Puff 'n Stuff Catering training manuals available for continuing education include: Culinary, Lead Event Chef, Supervisor and Bartender.

Additional resources including training videos and photos can be found on www.flickr.com.

Personal Presence & Presentation

Personal Presence

As a member of the Puff 'n Stuff Catering service team, you have a special responsibility to create the first and last impression for our clients and their guests. As **brand ambassadors**, how you interact with guests, fellow team members, managers, other vendors, and the general public sets the tone for the event.

GLOSSRY TERM → BRAND AMBASSADOR

A brand ambassador embodies the corporate identity in appearance, demeanor, values and ethics. This person is known as a positive spokesperson appointed as an internal or external agent to boost product/service sales and create brand awareness.

Body language includes body movements and gestures (legs, arms, hands, head and torso), posture, muscle tension, eye contact, skin coloring (flushed red), even people's breathing rate and perspiration. Additionally, the tone of voice, the rate of speech and the pitch of the voice all add to the words being used.

Body Language + Communication Do's...

- Do...**Project a **positive** and **friendly** demeanor.
- Do...**Combine your **superior technical** skills with warm, **personal service** to exceed our client's expectations.
- Do...**Stand confidently in an upright position while you are on the floor. Keep your hands tucked neatly at your side or clasped behind your back.
- Do...**Escort guests personally, or use open hand gestures to direct a guest to a location.
- Do...**Limit conversation front of the house to service related discussions only. It is the responsibility of the entire service team to ensure that a team member is available in all guest areas to answer questions, anticipate guest needs and resolve problems that may arise.
- Do...**Be clear, concise, and to the point, with the same respect you would like to be shown.

Do...Always give guests the right of way.

SAFETY TIP → CREATE AN ACCIDENT-FREE ENVIRONMENT

Make a diligent effort to keep all work environments safe and accident-free. Please observe safety rules at all time and report unsafe practices to your immediate Event Supervisor.

Body Language + Communication Don'ts...

Don't...Slouch, slump or lean against the wall.

Don't...Huddle or chat with your other team members or vendors on the floor.

Don't...Block aisles or put your back towards a guest.

Don't...“Bop”, dance, or participate in the event in anyway outside of providing exceptional and professional service.

Don't...Speak loudly, shout, or use profane language while on the job. You are “on stage” at all times, even during set up and break down.

Don't...Leave your station unattended. Inform your Event Supervisor if you need to leave your station for any reason.

Don't...Take any photos onsite at events. This includes for social media or any other purpose.

Don't...Use your cell phone at any time during your shift unless approved by your Event Supervisor.

Don't...Put your hands in your pocket or cross your arms while standing at attention.

Zero Tolerance Drug and Alcohol Policy

Working under the influence of alcohol, illegal drugs, or misused controlled substances is strictly forbidden. Puff 'n Stuff Catering also prohibits the use or abuse of prescription medication that may impair a team member's ability to safely and efficiently perform your assigned job. Any person who violates this policy will be subject to disciplinary action up to and including termination.

Presentation: Uniforms & Hygiene

Your appearance and personal hygiene can dramatically affect the experience and perception of our clients and guests. Maintain a clean and pressed uniform at all times.

When you arrive to your assigned work location, ask your Event Supervisor for an appropriate area to store your uniform until it is time to change for service.

TEAM WORK TIP → SMILE

Take pride in presenting yourself well, and pay attention to all the details from your **shoes** to your **hair**, and from your **smell** to your **SMILE**

Hair

- Hair must be neat, well groomed, and from a natural color spectrum.
- Hair must be restrained and secured away from your face, off your shoulders, and completely covered with a hat.
- Gentleman may keep facial hair, but all beards, mustaches, and goatees must be neatly trimmed and not present a bushy or unkempt appearance. Sideburns must not extend below the earlobe.

Nails

- Fingernails should be kept clean and manicured.
- Polish should be a natural color or French manicure.
- Chipped nail polish and extremely bold or bright colors are not permitted.
- Nail art, designs, or decals are not allowed.

Jewelry

Culinary team members are only permitted to wear a plain wedding band, flesh tone gauges, and post earrings.

Culinary team members are **not** permitted to wear any other jewelry to including: earrings, gauges, rings, watches, bracelets, or necklaces.

Tattoos

Visible tattoos must be covered from the time you clock in until the time you clock out. A long sleeve shirt or black sleeve may be worn underneath the uniform shirt to cover up visible tattoos.

Hygiene

Never eat, drink, or chew gum or mints in view of the guest. Please do not touch your hair, eyes, ears, or other areas of your body while working. If contact is unavoidable, wash your hands thoroughly, using soap and hot water, prior to returning to work. Should you need to sneeze or cough, do so into your folded elbow rather than into your hands.

Sanitation wipes are available on every event and should be used often when running hot water and soap are not available.

Smoking

Puff 'n Stuff Catering is a non-smoking company. Smoking allowed only at authorized locations at the commissary. Anywhere onsite at an event, or inside any company vehicle is NOT ALLOWED

Should you smoke prior to the start of your shift, you must wash your hands and re-fresh your uniform accordingly.

E-cigarettes and any other smokeless tobacco products are included in the above policies.

Uniform Guidelines

Item	Permitted	Not Permitted
Shirt/Set-up	Black short sleeve or or long sleeve PnS logo set up T-shirt	Any other shirt
Shirt/Service	Full sleeved black embroidered PnS logo Chef coat with personalized name	Any other shirt
Pants	Full length black dress pants with standard size belt loops	Athletic style, denim, cargo pants, pants with rivets, Dickies, Skinny, Denim, Shorts
Shoes & Socks	Polished, closed toe, black non-slip kitchen shoes	Sneakers, Crocs, open toe, Sperry-style, shoes without non-slip soles, shoes without a full back
Accessories (Set Up)	Solid, black socks Solid black leather belt with standard buckle	White, colored, or patterned socks Embellished belt buckles
Accessories (Service)	Black bistro length apron Black beanie or skull cap PnS Logo baseball caps maybe worn for outdoor events only	White or colored chef coats
Other Required Tools: A set of chef's knives and a thermometer for each shift they work.		

Sanitation & Food Safety

As a requirement of your employment in a culinary capacity with Puff 'n Stuff Catering, you **MUST** be either a certified food handler, ServSafe certified or become certified within 6 months of employment. You must carry your valid certification document with you at all times.

Gloves

Gloves are NOT new skin. They can help keep food safe by creating a barrier between hands and food. But if they are not properly used, they can contaminate food just as easily as dirty hands.

Wash your hands for at least 20 seconds between glove changes.

For all chefs including chef attended action stations, culinary team members must wear gloves during any food preparation when touching ready to eat foods that will not be cooked or heated.

Cleaning

Clean any surface areas to prevent the risk of cross contamination. Surface areas may include, but are not limited to: tabletops, counters, hot boxes, racks, cutting boards, and the floors beneath them in case of spills. You must also sanitize your knives and kitchen tools when changing tasks.

Food Safety Handling

Hands: Wash hands and clean your fingernails before work and whenever they become soiled or come into contact with a source of contamination. Always wash hands after visiting the restroom or while performing an act that is not in relation to the service of the event.

Service: Proper handling of service utensils, flatware, plates, or food will prevent the spread of infection or germs. Be sure that utensils are properly washed and dried before you take them to the dining area.

Food: Food is an excellent medium for harboring and spreading bacteria. It can be contaminated by dirty containers, contaminated hands, sneezing, coughing, poor storage conditions, or exposure to air, heat, or illness.

Cross Contamination: Cross contamination is what happens when bacteria from one food item is transferred to another food item, often by way of unwashed cutting boards or countertops, as well as knives and other kitchen tools, or even unwashed hands. Cross contamination can in turn lead to food poisoning.

Temperature: Cold temperatures inhibit the growth of bacteria, heat kills them, but moderate temperatures encourage growth. Therefore it is extremely important to refrigerate cold items, keep hot items hot, and serve all foods as quickly as possible.

- Never leave perishable foods exposed to room temperature for prolonged periods of time.
- Food must not be thawed and refrozen or chilled several times.
- If any item is questionable, i.e., it looks or smells funny, err on the side of caution and check with the Chef.

SAFETY TIP → FOOD SAFETY

Puff 'n Stuff Catering provides many methods of keeping food to temperature. As an Event Chef it is your responsibility to utilize them.

Required Cooking Temperate		
Item	Temperature	Duration
Poultry Products, Stuffing	165°	15 Seconds
Ground Beef, Pork, Flaked Meat	165°	15 Seconds
Eggs, Fish, Lamb, Beef	145°	15 Seconds
Rare Roast Beef (pull at 125 to carry over to 130 and not over cook.	130°	15 Seconds
All other foods, and reheated foods	165°	15 Seconds
Corrective Action Continue to cook to required HACCP temperature for specific product – reach temp within two hours		

Cooling

- Cool foods from 140° to 70° within 2 hours.
- Cool foods from 70° to 41° or below within 4 hours.
- Corrective Action Reheat to 165° within 2 hours and serve.
 - ⇒ Reheat to 165° and repeat chill process (one time only)
- Discard the product.

Hot Holding

- Hot foods must be maintained at 140° or above.
- Corrective Action: If food is held below 140° for less than 2 hours, reheat (only one time) to 165° or above and hold at 140° or above.
- If food is held below 140° for more than 2 hours, discard the food..

Cold Food - Always hold at 41° or below.

Frozen Food - Always hold at 30° or below. Optimum holding temperature is at 0°.

Remember to calibrate your Thermometer at least once every week.

Remember to clean your Thermometer, especially when checking foods under appropriate cook temp (best is alcohol swabs).

Keep Hot food Hot and Cold food Cold!

- Hot Food: Always hold at 140 degrees or above.
- Cold Food: Always hold at 41 degrees or below.

Receiving and Storage of Food for an Event: Properly inspect food for any source of defect. If a defect occurs, contact your Event Supervisor or Lead Culinary immediately.

Culinary Event Chef Survival Kit

Your personal Culinary Event Chef Survival Kit should include:

- Standard set of knives
- Stick lighter
- Pocket thermometer
- Sharpies
- Wine key

Your PnS Provide Culinary Event Chef Survival Kit should include:

- Pipettes
- Demi spoons and forks (Plastic)
- Rubber bands
- Disposable pastry bag
- Salt & white pepper
- Olive oil & balsamic
- Tongs
- Ladles
- Whip
- Rubber spatulas
- Labels
- Towels clean
- Extra skewers/picks for hors d'oeuvres
- Paper and pen for writing notes back with returning food
- Pastry brush
- Band aids / Finger Cots

KITCHEN EQUIPMENT

- TEST ALL EQUIPMENT IMMEDIATELY WHEN ARRIVING ON SITE.
- PLEASE VIEW ALL INFORMATION ON THE LAMINATED SHEETS ATTACHED TO THE EQUIPMENT.

Convection Oven (Double Door)

Restaurant-grade convection ovens on wheels typically sent for larger events with multiple food items. Holds 3, 7, and 8 quart inserts and half-sheet and full-size sheet pans.

INSTRUCTIONS FOR DOUBLE DOOR CONVECTION OVEN USE:

The unit must be set-up and installed upon arrival at venue to allow for proper cooking time. As soon as oven is off loaded from truck, begin hook up.

- After properly positioning oven for cooking, hook up propane tank and turn valve to “open”. Plug unit into standard 120volt outlet.
- Allow 2-3 minutes for propane gas to run through lines and outlets inside unit.
- After wait time, turn unit on.
- Set dial to “cook”.
- Turn blower switch to “high”.
- Set dial to proper temperature.
- Do not set fan timer control knob. This will impede the cooking process.
- Ensure doors are closed.
- Do not open doors during this time. This resets unit and therefore delays the process.
- These units will heat up quickly.
- Once temperature is reached, cooking can begin.

EFFICIENCY TIP → INSTRUCTIONS FOR USE

More detailed instruction can be found by scanning the equipment's QR label.

CONVECTION OVEN COOL DOWN

1. Once cooking is completed, unit should be cooled down before loading.
2. Turn gas to “closed” on the propane tank. Open doors and make sure blower setting is on “high”.
3. Set dial setting to “cool down”.
4. Wait 20 minutes. Turn off all switches, and unplug unit. Unhook propane tank and store tank under unit.

SAFETY TIP → EQUIPMENT - ETUP FIRMLY ON THE GROUND

Set oven and fryers on firm level ground, block, level or strap as needed for safety.

INSTRUCTIONS FOR CONVECTION OVEN CLEANING ONSITE

1. Allow oven to cool down before cleaning.
2. Remove oven racks and wipe down. Wipe down all surfaces. Use the Fantastic cleaning spray sent in the orange cleaning bucket.
3. Remove all food debris and grease from unit.

CONVECTION OVEN TROUBLE SHOOTING

- Is the gas valve on? Is there power to the unit?
- Have I adjusted the setting properly? Did I set the fan timer?
- Have I waited long enough?
- Are the doors closed? Am I constantly opening doors to check unit?

Turbo Oven

- Turbo Ovens: Small convection-style ovens typically sent for smaller events with limited food.
- (2) Turbos may be sent to accommodate the amount of food that needs to be heated.
- Holds 3 quart and 7 quart inserts and half-size sheet pans.
- **Does not hold 8 quart inserts or full size sheet pans.**

PUFF 'N STUFF CATERING

INSTRUCTIONS FOR TURBO OVEN USE (CONVECTION)

The unit must be set-up and installed upon arrival at venue to allow for proper cooking time. As soon as oven is off loaded from truck, begin hook up.

- After properly positioning oven for cooking, find available electrical outlet.
- Plug unit directly into standard 120volt outlet. Do not plug into power strip. Use extension cord if necessary.
- Turn timer on.
- Turn temperature dial to appropriate setting for the food you are cooking.
- Allow 10-15 minutes for oven to heat up.
- Open oven door to check temperature.
- Once temperature is reached, cooking can begin.
- Only 3 and 7 QT inserts and half sheet pans fit inside the oven. 8 QT chafer inserts and full-size sheet pans do not fit. Plan accordingly.

TURBO OVEN COOL DOWN

1. Once cooking is completed, unit should be cooled down before loading.
2. Turn timer and temperature off. Open doors and allow unit to cool down. Unplug from electrical outlet.
3. All spilled food and grease needs to be wiped out before returning.

INSTRUCTIONS FOR TURBO OVEN CLEANING ONSITE:

1. Allow unit to cool down before cleaning.
2. Remove oven racks and wipe down. Wipe down all surfaces. Use the Fantastic cleaning spray sent in the orange cleaning bucket.
3. Remove all food debris from unit.

SAFETY TIP → MOVING EQUIPMENT

A lot of this equipment is heavy with sharp corners. Use two people to load and unload.

PUFF 'N STUFF CATERING

TURBO OVEN TROUBLE SHOOTING

1. Is there power to the unit?
2. Is the unit plugged into an outlet that is drawing power to another device? You may have tripped the circuit.
3. Have I adjusted the temperature setting properly?
4. Did I set the timer?
5. Have I waited long enough?
6. All of the ovens are tested prior to loading. We do not send it if it is not operational. After troubleshooting, then make the call.

Butane Burners

Small table top burners that are fueled by butane cans. These burners are ideal for heating sauces, pastas, and/or sautéing items at chef attended action stations.

Use the hammered metal burner covers if the unit is to be set up in a **front of house** kitchen or station. Wipe the burner cover clean and free from any food debris, grease, or rust stains before setting it on a station or front of house.

INSTRUCTIONS FOR BUTANE BURNER USE (CONVECTION)

1. Open butane burner box and remove unit.
2. Turn cooking surface over.
3. Open canister cover.
4. Make sure ignition knob is in the “OFF” position and that the canister lever is in the “RELEASE” position. If the ignition knob is not completely in the “OFF” position, the canister cannot be engaged into the “LOCK” position.
5. Insert butane fuel canister and align the collar notch with the valve top.
6. Push the canister lever down to lock into position. Close the canister cover.
7. After checking the canister is positioned properly and canister lever is in the “LOCK” position, you are able to turn on the unit.

PUFF ‘N STUFF CATERING

8. Turn the ignition knob 90 degrees counterclockwise until you hear a “click” sound. If the burner does not light, repeat the ignition procedure.
9. The size of the flame can be regulated by turning the ignition knob slowly toward the “OFF” position from the “ON” position.

BUTANE BURNER COOL DOWN

1. Turn the ignition knob clockwise to the “OFF” position. The flame is automatically put out and there is no gas supplied.
2. The flame will be extinguished before the ignition knob is turned completely to the “OFF” position.
3. Raise the canister level up to the “RELEASE” position.
4. Open the canister cover and remove the fuel canister and store back in bus tub.
5. Turn cooking surface back over.
6. Set unit back into the box.

SAFETY TIP → EQUIPMENT

Always make sure the butane canister is seated firmly with the slot in the correct location.

INSTRUCTIONS FOR BUTANE BURNER CLEANING ONSITE

1. Turn unit off.
2. Wipe down all surfaces. Use the Fantastic cleaning spray sent in the orange cleaning bucket.
3. Shake unit free of food debris.

BUTANE BURNER TROUBLESHOOTING

1. Is the fuel canister full?
2. Did I lock the fuel canister into place?
3. Did I hear a click sound when I turned the ignition knob on?

Table Top Fryers

Small table top fryers may be sent onsite to fry particular items to order to ensure the best quality product for our clients and guests. Ex. French fries.

Small table top fryers may also be sent onsite to boil water and cook items like noodles to order. Ex. Pad Thai station.

Fryer oil will be sent separately on the event vehicle and must be cleaned out of the fryer and stored in an appropriate vessel for transport on the truck back to the warehouse.

SAFETY TIP → EQUIPMENT

Hot oil must be filtered and transported in blue safety barrel.

INSTRUCTIONS FOR TABLE TOP FRYER USE (WITH OIL):

PLEASE NOTE: YOU ARE RESPONSIBLE FOR DRAINING THE FRYER. ALLOW SUFFICIENT TIME FOR OIL TO COOL BEFORE DRAINING.

1. Pour oil or water in oil bin to maximum fill line.
2. Plug in unit into standard electrical outlet (120 volt).
3. Turn unit on and set thermostat to desired temperature. Recommended temperature for frying or boiling water is 350 degrees.
4. Unit will NOT operate until liquid has been added!

TIP → INSTRUCTIONS FOR USE

The Fryer PAN HAS to go on with the rim towards the rear! There is a safety switch that this shelf depresses to allow heating up.

TABLETOP FRYER COOL DOWN:

1. Turn unit off.
2. Reduce thermostat setting to "0" and unplug.
3. Allow sufficient time for oil or water to cool down before draining.
4. Carefully remove parts and wipe them down before placing on another surface.
5. Pour oil into provided BLUE METAL CAN& LID and secure lid appropriately.

PUFF ‘N STUFF CATERING

6. Wipe off excess oil from unit with a clean kitchen towel once all oil has drained. Remove all food debris from unit.
7. Reassemble fryer and wipe down each part accordingly and replacing correctly.

Store any and all towels used for cleaning, oil clean-up, etc. in a separate bag or in the orange bucket provided. Never set dirty or used towels in the linen bags.

INSTRUCTIONS FOR FRYER CLEANING ONSITE

1. Drain all oil or water from fryer.
2. Remove all food debris from fryer basket and unit.
3. Wipe down all surfaces of fryer. Use the Fantastic cleaning spray sent in the orange cleaning bucket.

TROUBLESHOOTING OPERATIONAL CHALLENGES:

There is usually only one problem besides having enough power (a dedicated outlet).

There is a shelf located on the frame of the unit—this shelf depresses the safety switch needed to power on the unit, it **MUST** be in the rear of the fryer for it to work—turn the frame around if needed.

Large Fryers

Small table top fryers or large fryers may be sent onsite to fry particular items to order to ensure the best quality product for our clients and guests. Ex. French fries, Cuban cigars, empanadas.

Fryer oil will be sent separately on the event vehicle and must be cleaned out of the fryer and stored in an appropriate vessel for transport on the truck back to the warehouse.

INSTRUCTIONS FOR DEEP FAT FRYER USE

PLEASE NOTE: YOU ARE RESPONSIBLE FOR DRAINING THE FRYER. ALLOW SUFFICIENT TIME FOR OIL TO COOL BEFORE DRAINING.

1. Connect hose to propane tank. Ensure that connection is good.
2. Make sure the drainage pipe for oil is removed door is closed (lever is at 90 degree angle to pipe).
3. Fill fryer with oil. Fill to Line—DO NOT over Fill—Site “Maximum fill line”.

PUFF 'N STUFF CATERING

4. Open valve on propane tank.
5. Turn temperature dial to “OFF” position.
6. Turn fryer gas valve to “PILOT”.
7. Push in and hold the gas valve and light the pilot. It is located between the burners.
8. Hold the gas valve in the “IN” position for a minimum of 60 seconds.
9. Release the gas valve and then turn it “ON” position.
10. When gas ignites, turn temperature gauge to the desired position.

INSTRUCTIONS FOR FRYER COOL DOWN

1. When finished, turn temperature gauge and gas valve to “OFF”.
2. Turn off propane.
3. Allow sufficient time for oil to cool down before draining.
4. Drain used oil from fryer into sauce pot and secure in BLUE OIL CAN with LID.
5. Load safely in secure location on event vehicle for disposal at PnS.

TROUBLESHOOTING OPERATIONAL CHALLENGES

Are there kinks in the hose that would prevent gas from flowing properly?

Did you wait the allotted time for gas to flow through while holding in the “IN” position?
Patience is key. This process can take several minutes.

Carter Hoffman Hot Boxes

Carter Hoffman hot boxes are used to hold hot food before and during food service.

- (1) Carter Hoffman hot box holds approximately (90) 10” plates with plate covers.
- (1) Carter Hoffman hot box holds approximately (45) 12” plates with plate covers.

INSTRUCTIONS FOR CARTER HOFFMAN USE (FOR PLATED SERVICE)

PLEASE NOTE: YOU ARE RESPONSIBLE FOR CLEANING ALL FOOD AND DEBRIS FROM THE EQUIPMENT BEFORE LOADING.

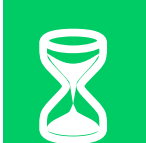

- Locate sterno fuel. For all plated functions, the warehouse will send a minimum of (1) case of sterno.
- Use (6-8) sterno per hot box. Remove caps from sterno and place inside bottom of Carter Hoffman. Space sterno evenly to allow for even heat distribution.
- Light sterno approximately (1) hour before plating begins. Set plates to be used for service inside the box to pre-heat.
- Do not set plates or pans of food on bottom shelf with sterno.

SAFETY TIP → EQUIPMENT

Hot Oil—Cool Down as soon as possible.

Wipe all spills immediately.

EFFICIENCY TIP → COOL DOWN TIMES

Fryer 1 hour // Small fryer 30 minutes

Hot Box 20 minutes // Oven with fan 15 minutes // Turbo 15 minutes

Butane Burner 15 minutes

INSTRUCTIONS FOR CARTER HOFFMAN COOL DOWN

1. Release door and open Carter Hoffman.
2. Extinguish sterno fire.

INSTRUCTIONS FOR CARTER HOFFMAN CLEANING ONSITE

1. Remove all used sterno from inside the unit, cool down and discard.
2. Remove all food and food debris from inside the unit and discard.
3. Wipe down all surfaces of Carter Hoffman, including top of unit. Use the Fantastic cleaning spray sent in the orange cleaning bucket.

SAFETY TIP → EQUIPMENT

A lot of this equipment is heavy with sharp corners. Use two people to load and unload.

Metal Hot Box

NAME = METRO

Metal hot boxes are used to hold hot food before and during food service.

INSTRUCTIONS FOR METAL HOT BOX USE

1. Locate sterno fuel.
2. Use (4-6) sterno total per hot box.
3. Place (3) sterno inside bottom shelf of hot box and remove caps. Space sterno evenly to allow for even heat distribution.
4. Place (3) sterno on (1) sheet pan and set midway from the top of the hot box. Space sterno evenly to allow for even heat distribution.
5. Light sterno approximately (1) hour before holding food.
6. Do not set plates or pans of food on bottom or middle shelf with sterno.
7. (26) 10 or 12" plates will fit in this box if needed for plate ups.

PLEASE NOTE: YOU ARE RESPONSIBLE FOR CLEANING ALL FOOD AND DEBRIS FROM THE EQUIPMENT BEFORE LOADING.

INSTRUCTIONS FOR METAL HOT BOX COOL DOWN

1. Release door and open hot box.
2. Extinguish sterno fire.

INSTRUCTIONS FOR METAL HOT BOX CLEANING ONSITE

1. Remove all used sterno from inside the unit and discard.
2. Remove all food and food debris from inside the unit and discard.
3. Wipe down all surfaces of Metro, including top of unit. Use the Fantastic cleaning spray sent in the orange cleaning bucket.

TROUBLESHOOTING OPERATIONAL CHALLENGES

- If sterno goes out leave door crack open to allow oxygen flow to flame.

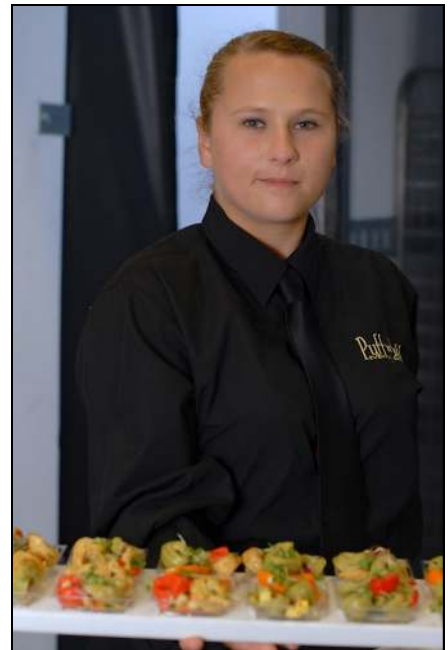

Butler Pass Execution

Product

- Butler pass menu items
- White porcelain trays *Note: This is (1) tray per item plus additional back up.*
- Tray garnish to include floral and fresh herbs

Station Set Up

1. Set butler pass stations away from the flow of the rest of the kitchen set up when possible.
2. Refer to SEO or Lead Event Chef/Event Supervisor for direction on where butler pass service will take place.
3. *If the HOD will be served in a different location than the main reception, you may need to set up a mini kitchen to execute service smoothly and efficiently.*
4. Locate on-site refrigeration if available. Store temperature-sensitive foods on cold plates or ice.
5. Set hot box with sterno to hold back up HOD items for large quantities or multiple hot butler pass items.
6. Light sterno approximately (1) hour before holding food.
7. Use heat lamp during plate up of HOD to maintain temperature.

Setting up Onsite Catering Kitchen

Kitchen Setups Basics: **Design or think through the plan, think of flow and courses of the menu.**

- A. Set Ovens, (Large Ovens must stay outside) Add Holding boxes / Hot boxes near the oven(s) * you may need a duplicate hot line inside and out.
- B. Setup fryers, Large gas fryer must stay outside (tent in case of rain)
- C. Setup Cold Area, Keep Cambros or cooling racks near this section
- D. Setup a Butler Pass Section (near expo) refer to diagram
- E. Setup sanitation area, Breakdown, hand wash, trash,
- F. Set (2) or more 6 or 8 foot tables end to end, back to back , a T or L shape depending on space, to provide enough room for you and other road chefs to pull items out of the oven and complete any final prep or garnish before sending it out to the buffet or expo-ing to the hotline.
- G. Locate on-site refrigeration if available. Store temperature-sensitive foods on cold plates or ice or keep in Cambros.
- H. Use table top butane burners to warm sauces for pastas or proteins when a stove top is not available.

Food Preparation

Review the SEO for timeline details. Guest count, pace of the event and length of time allocated for tray pass service will determine how much of each HOD item to heat at a time.

Use floral or fresh herbs to create a simple and sleek garnish. If there are specific garnishes or “look” for the butler pass plates, you will be given instructions by your Event Supervisor or Lead Culinary.

Heat food in stages if the time frame for butler pass extends over a long period of time.

Arrange HOD on half sheet pans for ease of execution and to easily place under heat lamps.

Focus on freshness and quality.

Have a portion of each item ready at least 15 minutes before service begins.

Remember that no one wants to eat a 3 hour, hot-held crab cake or a 2 hour old flatbread, especially when they take just 5 minutes to fire!

Garnish should be set up by each chef. You will have a chance to be creative and give a personal touch to your dishes for our guests. Use floral or fresh herbs to create a simple and sleek garnish. If there are specific garnishes or “look” for the butler pass plates, you will be given instructions by your Event Supervisor or Lead Culinary.

Set all butler pass items like soldiers! All item specific garnishes and sauces should be set the same way and all skewers facing the same direction.

Create visual interest on the plate! Do not over load or over crowd tray with too many items. Create even spacing between items and identical rows. One menu item should be plated per tray. Do not mix or send assorted platters of several types of HOD out unless requested by client or SEP.

Review the SEO for timeline details. Guest count, pace of the event and length of time allocated for tray pass service will determine how much of each HOD item to heat at a time.

Some events will have an ebb and flow of guests over an extended period of time, allowing food to be warmed in stages.

Focus on freshness and quality. We should strive to serve the absolute very best product possible to our clients and guests at all times throughout the event.

Review the menu items with the service staff, prepare a sample for them to see and taste, and explain the proper pronunciation. Be sure to answer any questions they may have before butler service begins. Unfortunately, sometimes this is not always possible for entire staff on smaller events, because of the amount allotted from the commissary.

Ensure that servers have cocktail napkins, demi fork, and skewer as needed to pass with.

Station Equipment

- SEO/Road Report
- 6 or 8 foot tables for prep/execution
- Heating element to include on-site oven and/or stove top, turbo, or large convection oven
- Heat lamp
- Hot box *(Optional based on structure of event)*

- Tabletop butane burner(s) with full fuel canister(s) to warm sauces
- Cold trays and/or ice
- Kitchen towels
- Kitchen utensils to include tongs, serving spoons, demi spoons, chef knives
- Gloves
- Thermometer
- White square beverage napkins

Station Execution

Review the menu items with the service staff and explain the proper pronunciation.

Prepare a sample for them to see and taste. Answer any questions before service begins.

Identify the main ingredients of each food item on the butler pass menu, including what items are vegetarian/vegan.

Plate (1) menu item per tray. Do not send assorted platters of several types of HOD out unless requested by client or SEP. Avoid cross contamination on plates.

Create even spacing between items and identical rows. Do not over load or over crowd tray with too many items.

Set all butler pass items like soldiers! Set item specific garnishes and sauces the same way and all skewers facing the same direction.

Wipe down platters and the rims of dipping sauce bowls with a clean kitchen cloth and reset garnish back in place.

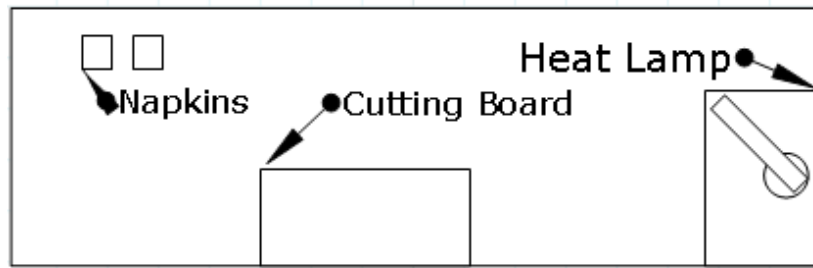

Do not hold HOD platters in hot boxes with garnish or sauces. This will cause the garnish to wilt. Sauce or add toppings to HOD with each tray pass.

ALL TRAYS FROM THE FIRST TO THE THIRD, AND THE LAST SHOULD ALL LOOK SLEEK, PRISTINE, AND CLEAN!

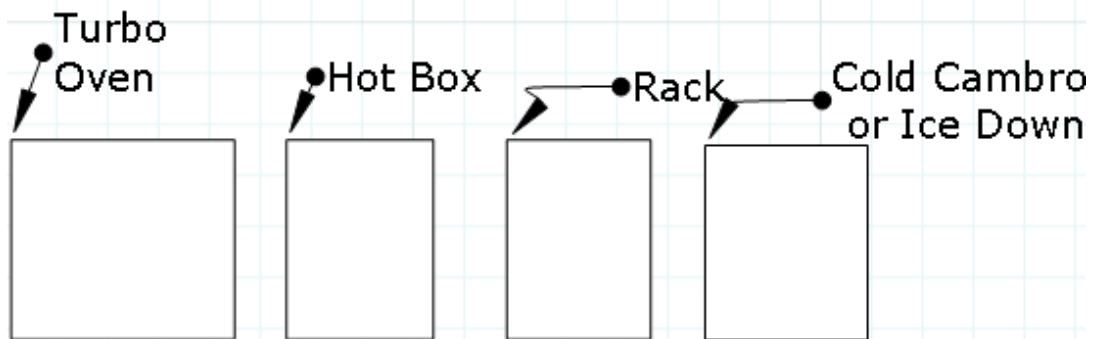

SAFETY TIP → SAVE THE SAUCE

Do not let flame touch the bottom of the sauce pot. This way the sauce will never scorch..

Butler Pass Station Setup

Butler Passed Execution

Make sure you are aware of all the main ingredients of whatever food item you may be plating. Guests with allergies, as well as vegetarians/vegans will want to know in particular about ingredients. Most common allergies are **gluten, soy, shellfish, nuts and dairy**. If a guest has a question or concern about a specific ingredient in an item and you are unsure, please seek out an answer from your Lead Event Chef before allowing the server to offer that item to the guest in question.

Avoid cross contamination on plates. If a seafood appetizer is plated on a specific tray, plate only that item on the platter and nothing else.

The first, third, fifth, and last trays should all look sleek, pristine, and clean. Wipe down platters and the rims of dipping sauce bowls with a clean kitchen cloth and reset garnish back in place.

Review timeline for butler pass service.

The pace of the event and food service will determine how much of each passed item to send out at a time. Some events will have a stream of guests coming and going over an extended period of time, allowing food to be sent

PUFF 'N STUFF CATERING

out in stages at a slow and steady pace. Others have just a short window to serve as much food as possible. If this is the case, be prepared to have that first rush ready to go! Have some items pre-plated prior to guest arrivals, preferably cold HOD that can hold.

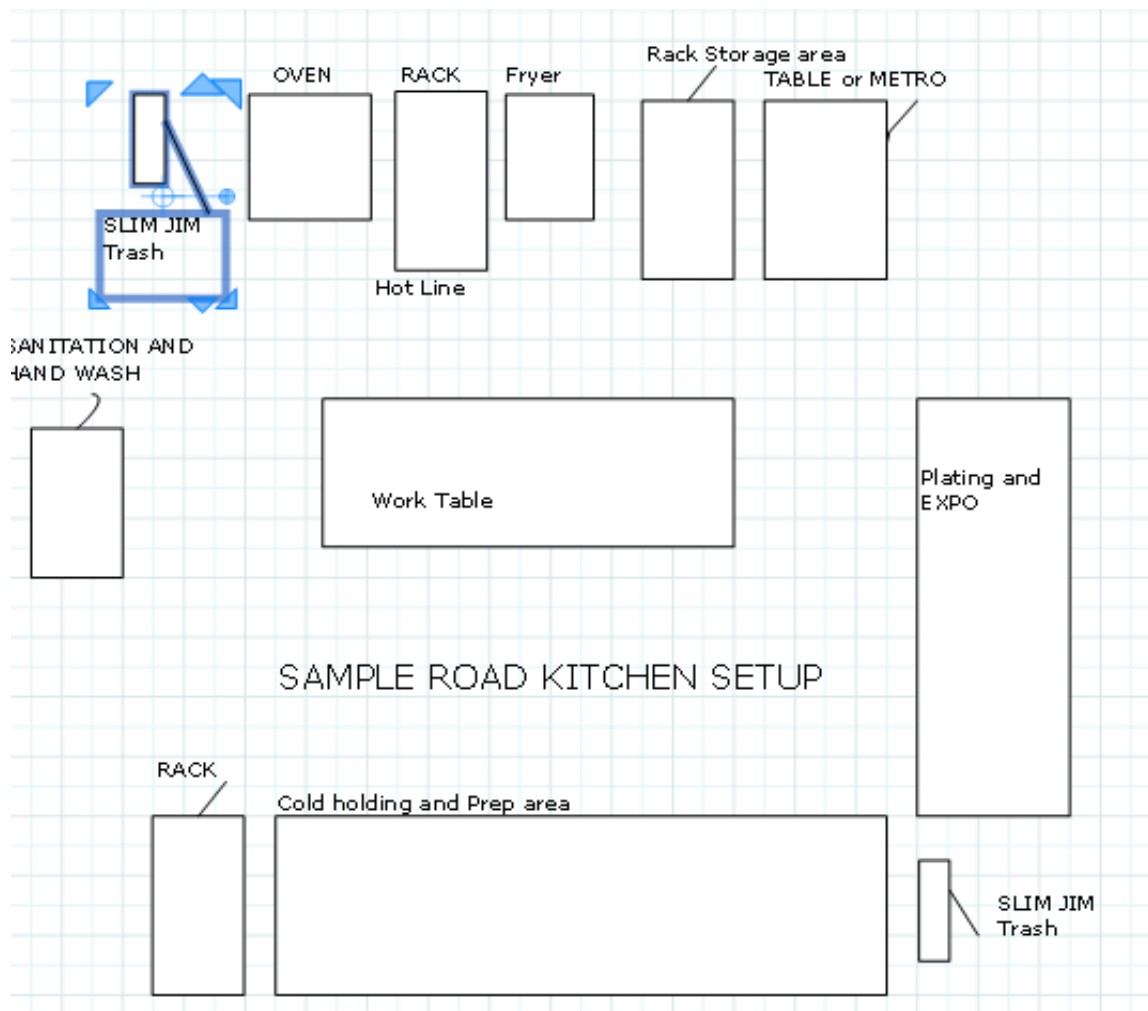

GLOSSARY TERM → PUFF ACRONYMS

SEO—Special Event Order : The BEO or contract with all the final details

HOD- Hors d'Ouerves—Appetizers

SEP— Special Event Planner: The Sales person

SEC—Sales Event Coordinator: The Sales Assistant

SAFETY TIP → EQUIPMENT

Remember that you are setting yourself up with a mini kitchen that you can work from with no other available resources so plan strategically!

BUFFET / CAAS EXECUTION

Set buffet/CAAS (Chef Attended Action Station) or stations strategically and creatively to manage the flow of guests around a room.

Set buffets as a single-sided or double-sided depending on the guest count, floor plan and available space.

Types of Stations and Buffets

- Hors D'oeuvres
- Breakfast, Lunch, or Dinner
- Dessert

Station Equipment

- SEO/Road Report
- 6 or 8 foot tables for prep and execution
- Heating element to include on-site oven and/or stove top, turbo, or large convection oven
- Hot box
- Tabletop butane burner(s) with full fuel canister(s) to warm sauces
- Cold trays and/or ice
- Kitchen towels

TIP → INSTRUCTIONS FOR USE

At Puff 'n Stuff Catering we don't serve anything with a frill pick or standard tooth pick so if there is one in the product that you are serving, It was only there for shipping purposes, and should be removed.

- Kitchen utensils to include tongs, serving spoons, demi spoons, chef knives
- Gloves
- Thermometer
- Refer to survival kit list for more ideas

WATER IN CHAFERS

- ⇒ 3QT chafers: ½ pitcher
- ⇒ 7QT chafers: ¾ pitcher
- ⇒ 8QT chafers: 1 pitcher

Station Set Up

1. Refer to SEO or Lead Culinary/Event Supervisor for direction on where buffet service will take place.
2. Locate on-site kitchen space if available. If a kitchen does not exist, you and your team members will need to build a kitchen.
3. Set up and turn on ovens immediately at start of kitchen set up. Refer to Kitchen Setup Module.
4. Set hot box(es) with sterno to hold back up HOD items for large quantities or multiple hot butler pass items. near expo areas.
5. Light sterno approximately (1) hour before holding food.

Food Preparation

1. Review the SEO for timeline details. Guest count, pace of the event and length of time allocated for tray pass service will determine how much of each buffet item to heat at a time.
2. Warm food in stages if the time frame for the buffet extends over a long period of time.
3. Heat starches first. Mashed potatoes, rice, or gratins are heavy and take the longest to heat through. If the starch needs to be crispy, like a roasted potato, uncover the pan and remove the foil toward the end of the heating process. If the starch is dry or has lost moisture content, please adjust content accordingly.
4. Simmer or bring sauces to temperature slowly so they do not scorch or break.
5. Heat white sauces on a double boiler, red sauces on low heat in non-aluminum pots, and other sauces on low heat offset on a burner or on a double boiler.
6. Warm vegetables just enough to take the chill off so that they do not overcook or turn grey. They will continue to heat through on the plate in the hot box. Vegetables like broccoli, broccolini, and asparagus should be a vibrant green.
7. Heat proteins to proper temperature in stages, a little at a time to ensure they do not overcook or dry out before service.
8. Organize the different items being held in the hot box for easy and efficient replenishment. I.E. All protein backups should be grouped together, all starches together, and all vegetables grouped in the same area within the hot box.
9. Fill chafers with water and light sterno approximately (1) hour before service begins.
10. Set all food on station approximately (20) minutes before service begins.

PUFF 'N STUFF CATERING

OVEN COOKING TIME

Beef Wellington BP	10-15 min	8-12 min	DO NOT	DO NOT	360°

Station Replenish

1. (1) or multiple food runners will be assigned by the Event Supervisor and/or Lead Event Chef.
2. Monitor buffet items as guests proceed through buffet line.
3. Remove foil covering from chafer inserts and plastic wrap from platters and bowls back of house before transferring to the buffet or station.
4. Remove any frill picks from dessert platters before transferring to the buffet or station.
5. Wipe edges of porcelain service ware from condensation if stored in refrigeration.
6. Use (2) clean, dry kitchen towels when removing pans from chafing dishes. This helps to prevent steam burns.
7. Remove the pans from the point farthest from the guest. This helps to prevent steam from rising into the guests' face.
8. Place the fresh pan into the chafing dish, with the point closest to the guest inserted first. This helps to avoid splashing of hot water onto the guest.
9. Give the food runner the empty pan.
10. Take the leftovers to the kitchen or food prep area. Never put the remains from the pan being replaced into the new pan.
11. Never take the serving utensil out of a hot chafing dish and place it back on the under liner. The serving spoon or tong **MUST** remain in the pan once it is placed in.
12. Reset all item specific garnishes and sauces the same way. Reset all skewers facing the same direction.
13. Wipe down chafers, porcelain service ware, and serving utensils of any food debris or condensation throughout service. Use a clean kitchen towel or cloth.

TEMP EACH AND EVERY HOT ITEM BEFORE REPLENISH THE BUFFET!

Plated Meal Execution

Plated service occurs on a pre-set timeline, which helps ensure that the event stays on schedule. Clients may choose to offer guests a single entrée, a dual entrée, or allow their guests to pre-select an entrée from a choice of menu options. Pre-selected entrées may be indicated on a guest's place card by a stamp, symbol, or color.

Equipment

- SEO/Road Report
- 6 or 8 foot tables for prep/execution
- Kitchen utensils to include tongs, serving spoons, demi spoons, chef knives
- Tabletop butane burner(s) with full fuel canister(s) to warm sauces
- Heating element to include on-site oven and/or stove top, turbo, or large convection oven
- Carter Hoffman Hot Box(s)
- Cold trays and/or ice / Cambros
- Kitchen towels
- Gloves
- Thermometer

Chefs BOH Station Set Up, Cold Food

1. Refer to SEO or Lead Culinary/Event Supervisor for direction on where plated execution will take place.
2. Locate on-site kitchen space if available.

3. If a kitchen does not exist, you and your team members will need to build a kitchen set up. Refer to the kitchen setup module on page 29.
4. Locate on-site refrigeration if available. Store temperature-sensitive foods on cold plates or ice.
5. Set (2) 6’ or 8’ tables together end to end so that you can lay out as many sheet pans or service trays, lined with plates, as possible. Stack up to 3 high so that the plating process runs smoothly.
6. Count out at least 10 more plates than you need to allow room for error.
7. Alert your Event Supervisor immediately if you are short the correct number of plates for any course.
8. Remove any chipped, cracked, broken, or mismatched from service immediately. Report it to your Event Supervisor or Lead Culinary who will record the issue.
9. When possible, 2 or more road chefs will be assigned to plate salads and desserts.
10. Each chef must be responsible for a separate step of the plating process to ensure maximum efficiency and speed.
11. Plate each component of the dish in a step by step sequence to ensure that the very last plate will look identical to the very first plate.
12. Load finished plates on sheet pans or service trays to be placed back on speed racks while awaiting refrigeration. Once speed racks are full and ready to be placed back in refrigeration, wrap the rack in saran wrap or place a body bag over top.

PLATED SALADS SHOULD REMAIN IN REFRIGERATION UNTIL JUST BEFORE SERVICE. 15-30 MINUTE EXPOSURE AT ROOM TEMPERATURE IS THE MAXIMUM TIME ALLOTTED. THIS IS DETERMINED ON A CASE BY CASE BASIS BY YOUR LEAD EVENT CHEF AND EVENT SUPERVISOR.

Plate Sizing

Salad - Generally 9” Round - Occasionally 7” round or 8” square

Entrée-10” Round; 12” Round

Dual Entrée- 12” Round or Specialty Plate

Dessert-7” Round; 8” Square

Refer to the SEO for specialty plates.

EFFICIENCY TIP → SAUCING EXPEDITIOUSLY

Ask your lead to discuss Shell Game saucing

Saucing & Garnish

Some entree items may be sauced or garnished just before service.

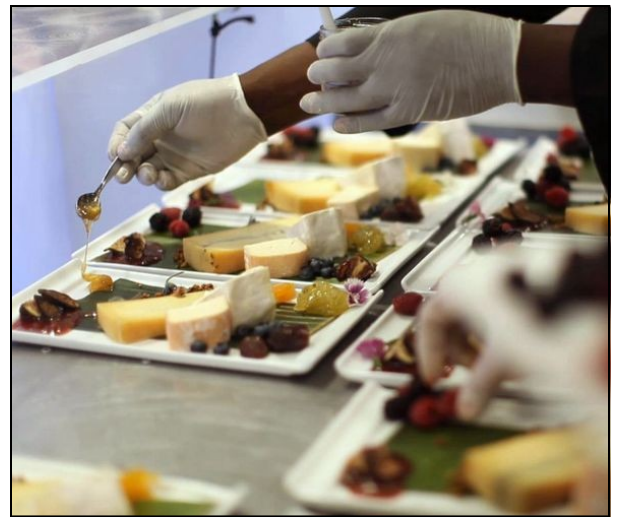

Remove the necessary number of entrees from the hot box and set them on the expo table.

Uncap the plate, sauce and/or garnish, wipe the edges of the plate, and recap.

Stack entrees on tray.

Chefs BOH Station Set Up, Hot Food

1. Set (2) or more 6' or 8' tables together end to end for the hot line.
2. Set up and turn on ovens immediately at start of kitchen set up.
3. A turbo oven(s) or large convection oven may be sent for heating food onsite. The type of oven you receive depends on the size of the event, number of different menu items and quantity of each item ordered.
4. Count out at least 10 more plates than you need to allow room for error.
5. Remove any chipped, cracked, broken, mismatched, or by any means unsatisfactory plates from service immediately. Report it to your Event Supervisor or Lead Event Chef who will record the issue.
6. Stage hot boxes at each end of the line. You will need (1) hot box to hold hot plates and (1) hot box for food waiting to be plated.
7. Warm plates in one of the hot boxes until you are ready to begin plating. Use (6-8) sterno to heat each hot box. Light sterno approximately (1) hour prior to start of plate up.

**TEAMWORK TIP → QUALITY**

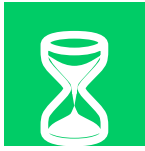

Crispy and flaky items should only be sauced underneath and never on top of the food.

To avoid sauce drips, either touch the filled ladle to the top of the bulk sauce or use a B&B plate to catch drips.

Plate Up Execution

1. Create an assembly line system for plate up.
2. Set (1) pan of each hot food item needed for the dish on the table.
3. Set protein(s) on the line first.
4. Plates can be passed down the line as each road chef places their assigned item(s) in the same position on each and every plate.
5. Then plate the accompanying sauce, then the starch, vegetable, and a garnish when specified.
6. **When the sauce is to be placed underneath the protein, begin the plating line with the sauce first and then move on to the protein.**
7. When no special plating instructions are given, Set protein(s) at 6 o'clock, vegetables at 10 o'clock, and starches at 2 o'clock.
8. Sauce proteins at the very last moment before service begins. Certain sauces may break or dry out on the plate while holding in the hot boxes.
9. Place fresh garnish on plates after sauce and just before plates are expedited for service.
10. Place all food items within the rim of the plate. One road chef must also be responsible for wiping down all finished plates, paying close attention to the rim of the plate for excess sauce or food debris.
11. (1) Road chef or steward will be assigned at the end of the line to check, and cap plates and stack them into the hot box assigned for finished plates. This chef is responsible for keeping an accurate count of all plates in the box. Plates should be confined to the top 2 racks of the box due to the higher temperature and heat rising. The bottom shelf gives little heat.

EFFICIENCY TIP → SAUCING

To sauce expeditiously, using a two man team. Remove a stack of plates from the Carter Hoffman, place top lid aside and move entrée to the waiter tray, sauce and cover with next lid from the stack of plates, repeat process using lid from a new stack to continue.

SAFETY TIP → HANDLING PLATES

Check that plates are seated properly in stack and plate covers are secure
Check that server can handle the weight of a full tray

Service Execution

1. The Event Lead Chef will determine the execution area for plated service.
2. For large plated functions, (2) or more expo areas may be set up to quickly and efficiently expedite food service.
3. Set (1) 6 or 8 foot table in place to create a barrier between you and the service team during expo.
4. Locate large oval trays for service. Split between multiple expo stations if needed. Line all oval trays used for service with (2) black linen napkins each and stage at end of the 6 or 8 foot table.
5. The Event Lead Chef or a designated road chef will expedite orders to the rest of the culinary team.
6. The server will approach the expo station and communicate with the expeditor to retrieve each table's meals. Communicate with the servers that the plates will be hot to the touch.
7. Each team member will be assigned to retrieve a specific item during expo.
8. Always be aware of the location of the specialty meals. i.e gluten free, vegetarian, children meals, etc

SERVICE EXECUTION IS NOT COMPLETE until all guests meals have been served. DO not scatter, or leave your assigned station until this has occurred.

Hazardous Analysis & Critical Control Points

7 Principles of HACCP PRINCIPLES OF HACCP

1. Identifying Hazards

Examples of potentially hazardous foods include: eggs and egg products, milk and milk products, meats, poultry, seafood, tofu or other soy protein foods, and baked potatoes.

Identify possible hazards at each step in the flow of food and determine severity and risks.

2. Identifying Critical Control Points

Any point or procedure in a specific food system at which control can be applied and a food safety hazard can be prevented, eliminated or reduced to acceptable levels.

(7) Critical Control Points:

- I. Raw food is cooked to correct minimum internal temperature.
- II. Hot food must be maintained at a minimum temperature of 140°F (60°C) or above while holding and serving.
- III. Food is cooled quickly and safely to 70°F (21°C) within (2) hours and then to 45°F (4°C) or below within an additional (2) hours (total cooling time 4 hours).
- IV. Food that is cooked, cooled, and reheated for hot holding is reheated rapidly within (2) hours to 165°F (74°C) for 15 seconds.
- V. Cold food must be maintained at 45°F (4°C) or below while holding and serving.
- VI. Refrigeration equipment must be maintained at 45°F (4°C) or below.
- VII. Hands are properly washed and disposable gloves or clean, sanitized utensils are used to prevent contamination of ready to eat food from hands.

3. Setting Up Procedures And Standards
4. Monitoring Critical Control Points
5. Taking Corrective Action

If food temperatures are found to be outside the safe range for a specified time, appropriate action must be taken immediately to prevent the occurrence of a food borne illness.

Example:

Critical Control Point: Raw Food is cooked to correct minimum internal temperature.

Observation: Baked chicken has not been cooked to minimum internal temperature of 165°F (74°C).

CORRECTIVE ACTION: Continue cooking process until chicken has reached correct internal temperature. Temperature must register on thermometer for 15 seconds. The chicken may not be served or used for further processing in recipe until it has reached the required internal temperature. Record action.

6. Developing HACCP record keeping dystems
7. Verifying that the HACCP program is working

How Food Becomes Unsafe

Biological Hazards: Certain bacteria, viruses, parasites, and fungi, as well as certain plants, mushrooms, and fish can carry harmful toxins.

Chemical Hazards: Pesticides, food additives, preservatives, cleaning supplies, and toxic metals that leach from cookware and equipment.

Physical Hazards: Consist of foreign objects that accidentally get into the food, such as hair, dirt, metal staples, and broken glass, as well as naturally occurring objects, such as bones in filets.

Time-Temperature Abuse: Any time food has been allowed to remain too long at temperatures favorable to the growth of food borne microorganisms. This can occur if food:

- Is not held or stored at required temperatures
- Not cooked or reheated to temperatures that kill microorganisms
- Improperly cooled

Cross Contamination: Occurs when microorganisms are transferred from one surface or food to another. A food borne illness can result if cross-contamination is allowed to occur in any of the following ways:

- Raw contaminated ingredients are added to food that receives no further cooking
- Food contact surfaces are not properly cleaned and sanitized before touching cooked or ready-to-eat food.
- Raw food is allowed to touch or drip fluids onto cooked or ready-to-eat food
- A food handler touches contaminated (usually raw) food and then touches cooked or ready-to-eat food.
- Contaminated cleaning cloths are not cleaned and sanitized before being used on other food-contact surfaces.

Poor Personal Hygiene: A food borne illness can result if employees do any of the following:

- Fail to wash hands properly after using the restroom or whenever they become contaminated
- Cough or sneeze on food
- Touch or scratch sores, cuts, or boils, and then touch food they are handling
- Come to work while sick

EFFICIENCY TIP → INSTRUCTIONS FOR USE

Wash hands with every glove change.

Wash hand when entering a food area.

Preventing Cross-Contamination

- Wash hands frequently when working with raw food.
- Wash and sanitize or discard cutting surfaces.
- Do not allow raw food to touch or drip fluids onto cooked or ready-to-eat food.
- Clean and sanitize cleaning cloths between each use.

- Clean and sanitize food-contact surfaces (such as equipment or utensils) that touch contaminated food before they come in contact with cooked or ready-to-eat food.
- Assign specific equipment to each type of food product.
- Food-contact surfaces, cleaning cloths, and sponges must be cleaned and sanitized to prevent cross contamination! *Clean* simply means free of visible soil. *Sanitary*, means that the number of microorganisms on the surface has been reduced to safe level.

SAFETY TIP → FOOD SAFETY

Hazard Analysis and Critical Control Points

A system to prevent hazards from occurring during food production vs. completed product inspection.. Examples of potentially hazardous foods include: Eggs and egg products / milk and milk products, meats, poultry, seafood ,tofu or other soy protein foods

NOTE: *Bacteria grows in moisture* so anything containing moisture can be hazardous

Proper Hand Washing

1. Wet your hands under running water as hot as you can comfortably stand (at least 100 F).
2. Apply soap.
3. Vigorously scrub hands and arms for at least twenty seconds.
4. Clean under fingernails and between fingers.
5. Rinse thoroughly under running water.
6. Dry hands and arms with a single-use paper towel or warm-air hand dryer.
7. Food handlers must wash their hands before they start work and after the following activities:
 - Using the restroom
 - Handling raw food (before and after)
 - Touching the hair, face, or body
 - Sneezing, coughing, or using a handkerchief or tissue
 - Smoking, eating, drinking, or chewing gum or tobacco

- Taking out garbage or trash
- Clearing tables or busing dirty dishes
- Touching clothing or apron
- Touching anything else that may contaminate hands, such as unsanitized equipment, work surfaces, or washcloths

Hand Maintenance

1. Keep fingernails short and clean.
2. Cover all hand cuts and sores with clean bandages and gloves during food preparation, production, or execution.

Use of Gloves

1. It is important gloves fit your hand properly.
2. Gloves used to handle food are for single use only and should never be washed or re-used.
3. Food handlers should change their gloves:
 - As soon as they become soiled or torn.
 - Before beginning a different task.
 - At least every four hours during continual use, and more often when necessary.
 - After handling raw meat and before handling cooked or ready-to-eat food.

TIP → CLEAN AS YOU GO!

- Line Trash Cans if Empty
- Toss plastic wrap out as you unwrap trays or platters
- Clear and wipe down stations between every task and every course
- Clear tops of trays and holding cabinets often for added space in a jam
- Consolidate racks keeping food like types together and ordered HACCP style

Proper Work Attire

- Wear a clean hat or proper hair restraint.
- Wear a clean and complete uniform daily to include black Puff 'n Stuff Catering set up shirt, Puff 'n Stuff logo chef coat, black beanie, and black bistro apron. The PnS logo baseball cap is ok for outdoor events only.
- Remove aprons when leaving a food preparation area.
- Wear appropriate shoes.
- Remove jewelry prior to beginning their shift.

Policies For Eating, Drinking, Chewing Gum or Tobacco

These activities are strictly prohibited in any food preparation or production area onsite at an event.

Smoking or consuming ANY tobacco product is **NEVER** permitted on event sites at any point during your shift.

If foods must be tasted during production, place food item into a separate container and use disposable spoon to taste food outside the food preparation area. Discard container (if disposable) and spoon immediately outside of the food preparation area.

Hands must be washed before returning to food preparation area.

- Use of sanitation bucket with QUAT tab, or 200 parts per million bleach solution (1 tsp bleach to 3 gals of water).
- Use of alcohol swabs for thermometer is a surefire way to sanitize, especially after probing undercooked proteins.

Breakdown & Load Up

Tips and Tricks for a Successful Breakdown

Trash, Liquid, and Ice Disposal

- Dispose of the dump bucket strainer debris (stir sticks, bar fruit, napkins, and bar picks) in a trash can only. Never discard into a sink.
- Only dump ice or liquid into working sinks, drains, or dump buckets.
- Never dump ice into the grass.
- If you are unsure if you are able to properly dispose of trash or liquid onsite, always ask your Event Supervisor!

Speed Racks

- Store like with like, clean with clean, and dirty with dirty.
- Dispose of all leftover food products from chafer inserts, dump all sauces from containers and bowls, and clean off platters from any remaining food debris before loading onto speed racks.
- Do not over stack porcelain platters, bowls, or other breakable vessels on top of each other. If packed incorrectly, these fragile items can be broken during transport with just one single bump in the road!
- Load speed racks with reusable food product to be returned to the PnS commissary last onto the vehicle.

NEVER MIX CLEAN, REUSABLE FOOD OR PRODUCT WITH DIRTY PRODUCT OR EQUIPMENT!

TEAM WORK TIP → START WITH THE END IN MIND

Remember that an organized and efficient breakdown begins at the start of the shift.

Decor

- Decor must be returned to the containers that it was sent in.
- Do not load decor in a container with other event equipment.
- If you are unsure of how or where to properly load decor, always ask your Event Supervisor!
- Linen
- Shake all linen free of food and debris into a garbage can before striking it from the table.
- Alert your Event Supervisor if the linen has been stained or damaged during the event.
- Bag dirty linen in logo linen bags.
- Use method at the event that you do not have enough linen bags. Pull linen out of the bag to flag it so that it is not mistaken for trash.
- Never mix wet linen with dry linen. Separate any wet linen into another linen bag.
- Never mix dirty bar towels or kitchen rags in with dirty linen. Kitchen towels or rags should be stored in a separate container and organized on a kitchen speed rack.
- Count rental linens piece by piece and cross check against the count provided by the rental company order sheet. Store in the rental company-provided linen bag at the conclusion of the event.

Venue and Facility Clean Up

Comply with all items on facility caterer agreement checklist for end of event to include:

- Strike and/or reset of tables and chairs
- Sweeping, vacuuming, and mopping of facility floors and carpets
- Removal of all trash from the property
- Cleaning of kitchen space and equipment
- Onsite kitchen and staging space
- Wipe down all counters and food prep and breakdown areas.
- Use cleaning supplies provided in orange cleaning buckets.
- Remove all food debris from ovens, stove tops, and hot boxes.

PUFF 'N STUFF CATERING

- Remove all food and beverage product from onsite refrigerators or walk-in coolers.
- Clear all sink drains of debris and ice.
- Sweep and mop facility floors.

Final Walk Through

- Complete a final walk through of facility or residence with your Event Supervisor, Lead Event Chef, and venue representative or client if event is at a private residence.
- Look for miscellaneous glasses, plates, and trash that may have been left behind as you walk the space.
- Return any guest "lost and found" items to your Event Supervisor, who will then communicate with the client and/or SEP if the client has already departed.
- Remove all team member belongings from the venue.

Always remember we are guests...

ALWAYS STRIVE TO LEAVE THE EVENT SITE JUST AS CLEAN, IF NOT CLEANER, THAN YOU FOUND IT!

GLOSSARY TERM → BRAND AMBASSADOR

A brand ambassador embodies the corporate identity in appearance, demeanor, values and ethics. This person is known as a positive spokesperson appointed as an internal or external agent to boost product/service sales and create brand awareness.

REFERENCE DOCUMENTS: Carving Sample Station Setup Guide A

Steps of Service

- Build multiple plates in one sequence. Serve multiple guests at the same time while you are continuously working to build plates for your next set of guests.
- Plate vegetable, then starch, followed by protein and accompanying sauce.

NOTE: For Steak and Asparagus, Plate Starch Then Asparagus, then protein and sauce..

- Ask guests' preference on temperature of meat. End pieces will be more well done while center cuts will range from medium rare to medium.
- Carve meat across the grain. Cut pieces thin to win! Slices should be less than width of your finger (approx. 1/4")
- Offer accompanying sauce to guests. Sauce plates, garnish, and wipe edges of plates.
- Present plate to guest.
- Guest to pick up flatware and napkin last.

NOTE: Plate multiple plates if more than one or two guest are at the station.

REFERENCE DOCUMENTS: Carving Station Setup Guide B

Station Set Up	Station Equipment
- Set chafers for vegetable and starch accompaniment immediately to the right of plates. - Set heat lamp and cutting board set at end of station followed by sauce and garnish for plates. - Locate power source for heat lamp. Tape extension cord down to prevent trip hazards for staff and guests. - Perform final check of all station equipment for cleanliness. Clean as needed. - Fill chafers with water and light sterno approximately 30-45 minutes before station opens. - Make sure that station is visually set and ready 30 minutes prior to the start time of the station. - Set all food items on station 15 minutes before station opens. - Create show plate and display out of reach from the guests.	(1) Cutting board and heat lamp (1) Carving fork and knife (1) Extension cord and tape for heat lamp (2) 3/7/8 Quart chafers starch and vegetable *Note: Chafers may change in # and size based on menu components. (50) Plates stacked in (1) set of 10, 15, 25; Set out of guests' reach (50) Pieces of each appropriate piece of flatware on under liner plates - Napkins - Kitchen cooking and serving utensils on under liner plates for chef-handled station ingredients - Tongs if Asparagus is Vege - Serving utensils on under liner plates for guest-handled station ingredients - Chef Station Kits (Kitchen towels, gloves, sanitation wipes) - Votive candles and greenery - Décor as specified by SEP/Supervisor - Menu card and stand
